Research Interests

My research focuses on building personalized foundation models and intelligent systems that understand and adapt to each individual. I study how models infer people's preferences from implicit signals such as user-generated content and interaction histories, and how to adapt models to each user in modular, efficient, and scalable ways. I am also interested in personalized agents with long-term memory that proactively assist individuals and groups.

Education

University of Notre Dame, Notre Dame, IN Aug 2023 – May 2027 (expected)
Ph.D. in Computer Science and Engineering; advisor: Prof. Meng Jiang
Thesis: *Building Personalized Foundation Models and Intelligent Systems*

Xi'an Jiaotong University, Xi'an, China Aug 2019 – Jul 2023
B.E. in Computer Science and Technology; advisor: Prof. Minnan Luo

Industry Research Experience

Microsoft, Office of Applied Research, Redmond, WA May 2026 – Present
Research Intern; hosts: Dr. Pei Zhou, Dr. Mengting Wan

- Developing shared-context briefs, now used internally, for proactive agents in long-term, multi-person Teams collaboration, distinguishing decisions from proposals and tracking attribution, disagreements, and project state.
- Evaluating claim grounding, attribution, and freshness using GroupMemBench-based simulations with oracle references; early results show stronger recovery of past state than prediction of future opportunities and risks.

Google, CoreML, Remote Oct 2025 – Apr 2026
Student Researcher; hosts: Dr. Yan Zhu, Dr. Xiang Zhai

- Developed BLUE, a reinforcement learning framework that trains an LLM to generate interpretable user profiles using recommendation rewards and a next-item prediction objective.
- Improved recommendation across five domains with a frozen embedding model, including zero-shot transfer from Amazon Clothing to three Amazon categories and Google Local Review. First-author paper: NeurIPS 2026.

Amazon, Rufus, Palo Alto, CA Jun 2025 – Oct 2025
Applied Scientist Intern; hosts: Dr. Zixuan Zhang, Dr. Haoyang Wen

- Developed Profile-to-PEFT, an end-to-end hypernetwork that maps user profiles directly to LoRA adapters, eliminating per-user training at deployment and generalizing to unseen users.
- Outperformed prompt-based personalization and per-user fine-tuning (OPPU); generated personalized adapters in 0.57 s per user, achieving 33× faster adaptation than the fastest OPPU variant. First-author paper: ACL 2026.

Microsoft, Office of Applied Research, Remote Mar 2025 – Jun 2025
Research Intern (part-time); hosts: Dr. Pei Zhou, Dr. Mengting Wan

- Built the Meeting Dynamic Forecasting Benchmark (MDFB) with 2,207 real-world meetings and 24,794 forward-looking queries; contributed to GLARE, an adversarial-reward post-training method for multi-party discussion forecasting.
- Contributed to data generation for Meeting2Doc, using DoLoMiTes examples to generate synthetic meeting transcripts that reflect real-world data distributions.

Amazon, Rufus, Palo Alto, CA May 2024 – Oct 2024
Applied Scientist Intern; hosts: Dr. Zheng Li, Dr. Tianyi Liu

- Developed PUGC, converting unlabeled user-generated content into scalable preference data for DPO.
- Achieved a 35.93% length-controlled win rate on AlpacaEval 2.0 with Mistral-7B-Instruct-v0.2, 9.37 percentage points above DPO with UltraFeedback preference data. First-author paper: ACL 2025.

Honors, Awards, and Research Grants

Tinker Research Grant, Thinking Machines Lab ($5,000 in Tinker API credits)	2026
Lambda Research Grant, Lambda ($5,000 in compute credits)	2026
OpenAI Researcher Access Program, OpenAI ($10,000 in API credits)	2025
Top Reviewer, NeurIPS	2024
Excellent Bachelor's Thesis (ranked 1/172), Xi'an Jiaotong University	2023
AAAI Student Scholarship	2022
National Second Prize, China Undergraduate Mathematical Contest in Modeling (CUMCM)	2021
Dean's List, Xi'an Jiaotong University	2020 – 2022

Professional Service

- Senior Program Committee Member: AAAI 2027.
- Area Chair: ARR (2025–present).
- Conference Reviewer: NeurIPS (2023–; D&B 2022), ICLR (2024–), ICML (2025–), ARR (2023–), COLM (2024–), KDD (2024–), AISTATS (2025–), WWW (2024–2025), ICWSM (2023–), LoG (2022–2024).
- Journal Reviewer: TMLR, IEEE TKDE, IEEE TNNLS, IEEE/ACM TON.
- Workshop Reviewer: ACL SRW 2025; ICLR AGI 2024; EMNLP WiNLP 2024; ACL KnowledgeNLP 2024; AAAI GCLR 2024; NeurIPS TGL 2023.
- Volunteer: EMNLP 2022, 2023.

Mentorship and Leadership

Director, LUD Lab, Xi'an Jiaotong University 2022 – 2023
Led a 17-person undergraduate research group.

Selected Mentees (research contributions and subsequent positions, where applicable):

- Heng Wang: NLGraph (NeurIPS 2023 Spotlight), MVSD (EMNLP 2023) → Ph.D., UIUC
- Yuhan Liu: BotMoE (SIGIR 2023) → Ph.D., NYU
- Yuyang Bai: KGQuiz (WWW 2024 Oral) → Ph.D., Texas A&M
- Zijian Cai: LMBot (WSDM 2024) → M.S., Institute of Automation, CAS
- Sen Ye: HOFA → Ph.D., Peking University
- Thomas Mitchell: undergraduate researcher, University of Notre Dame

Teaching

University of Notre Dame

Teaching Assistant, CSE 40113: Design and Analysis of Algorithms	Spring 2024
Teaching Assistant, CSE 30124: Introduction to Artificial Intelligence	Fall 2023
